Frontend Developer

I'm very good fast learner ,very good problem solver , very good use API by vanilla JavaScript and react, more experience communication, I need practice my academical studies, trainings and extend my professional experience from both career and personal prospective in order to add a value for the corporate.I love turning beautiful designs into usable websites that respond to various devices and user contexts and are powered by code that's just as beautiful, as well as scalable. I always seek perfection to make my projects unique and creative and I do so by keeping my eyes on the new tools, reading articles and follow the right people on linkedin,twitter,youtube.
